It is a simple, and yet efficient way to remove twitter tweets from your account. If you have a huge number of old tweets you no longer need, and you want to rid of them, you can use Twitter Delitter to help you with this process. Delete tweets from your feed This application can help you remove tweets from your live Twitter feed in an efficient manner, without requiring you to be logged in your account in real-time. After you launch the application, you will be prompted to download your feed from your account and import it into the application. After you import the downloaded archive, you can view a list of tweets that are available on your live feed and even filter the contents by the client used to post the tweet and the year when they were posted. It would be more accurate to say that this app lets you mark your tweets and deletes them only after you log in your Twitter account from the program. Backup and restore You can backup the contents of your modified live feed restore them later if needed. To do so, you just have to access the "Backup & Restore" option from the "File" menu, choosing between "Backup" and "Restore" and defining a destination path or a target one. The "Tools" menu enables you to view a queue of messages that will be deleted after you log in your account, access a log of app events and adjust various settings from the "Options" window. Simple configuration menu Twitter Delitter comes with a standard configuration window where you can adjust a few parameters to fine tweak the application's behavior in order to suit your needs better. It is possible to delete the current Twitter archive from the application by navigating to the "Twitter" tab in the 1d6a3396d6
