As a lot of you may know, we have been working on this for some time now. Time to show some results! We have been working over the past year on a dedicated, Hi-Fi-oriented analogue emulation project. Our goal is to provide a modern mixer, that can serve as a great companion to any audio project. Everything needs to be customizable, from the features, to the custom controls to the overall interface. Our first draft which we present here is a 32-channels mixer, with 8 inch stereo analogue monitors. We have put a lot of work into it and we feel confident it will be one of the best sounding mixers on the market. All this while staying very well within the bounds of what a 32-channel mixer should be and looks like. You can use the 8 mix down channels to mix 8 tracks. For instance, use channels 1-4 to mix tracks 1-4, channels 5-8 to mix tracks 5-8
