

July 18, 2019- Powerful cloud POS system. BMO API provided. . Brochure on QMS, 20.09.2021, Download brochure on QMS. POS terminal device drivers. A POS system is a collection of devices that are required to accept payments from customers. Its main purpose is to automate the process of paying for goods and services for cash or plastic cards. As a rule, the POS-system includes: a€ terminal; a€ cash software; a€ Barcode Scanner; a€ POS-monitor; a€ a printer; a€ money box; a€ scales. Depending on the size and specifics of the business, the POS system includes a different number of devices.
