Many websites teach you how to use Photoshop. This book includes some basics, but one of the best ways to learn is to practice. The following sections discuss some of the tools available in Photoshop and how to use them to create images, from basic to advanced. For a deeper look at the Photoshop tools, take a look at the "Taking Images and Saving Them in Photoshop" sidebars to this chapter. Getting familiar with the tools The main palette is the place to start when you first use Photoshop and is where most editing is done. Figure 13-1 shows the interface. **Figure 13-1:** The main palette's tools. The Layer panel is the second most useful area in Photoshop. The bottom area is where you use layers to create separate areas of an image and the layer mask that gives you the ability to manipulate the way you want that area to appear. Figure 13-2 shows the Layer panel in Figure 13-1, and Figure 13-3 shows the Fill and Adjustment Layers that appear under the Layer panel. These are shown in the following sections. **Figure 13-2:** The Layer panel is your one stop shop for manipulating your image, including working with layers. **Figure 13-3:** Layers give you flexibility to hide, mask, and rearrange areas of an image. The toolbar at the top enables you to manipulate the image in various ways and also contains the settings that control some of the tools and preset features. Figure 13-4 shows the tools that are available when you have the toolbar visible. Figure 13-5 shows the options available by using the tool settings in the Tools Options window. **Figure 13-4:** The toolbar is available in almost every screen (see the Tab and Modify buttons in the upper-right corner). **Figure 13-5:** The Tools Options window (Windows) or Preferences dialog (Mac) reveals additional tools and settings that are available from the toolbar. Layers give you the ability to separate areas of an image for editing. (You use them in the next few sections of the chapter.) In Figure 13-1, you see the Fill and Adjustment Layers under the Layer panel. You use these to change the appearance of the area they apply to. Photoshop uses a combination of color, grayscale, and transparency to create images. The following sidebar, "Taking Images and Saving Them in Photoshop," gives

8 (8.0.4) Adobe Photoshop Elements 11 Adobe Photoshop Elements The main difference between Photoshop Elements and Photoshop is that Photoshop Elements does not contain full Photoshop's features. For that reason, only Photoshop Elements 8 and Photoshop Elements 11 are really good alternatives to Photoshop. The following guides are about the three editions of Adobe Photoshop Elements. We will use the new version of Photoshop to edit images, because of the more detailed instructions. Adobe Photoshop Elements 8.0.4 – CHEAPEST When you open Photoshop Elements 8.0.4, you are given the option to import images and then find them. Or you can choose to load or open a folder with image files. Photoshop Elements 8.0.4 – UI Photoshop Elements 8.0.4 – EXAMPLE Photoshop Elements 8.0.4 – Graphics panel Adobe Photoshop Elements 8 is still the most user-friendly version of Photoshop Elements. As mentioned before, it does not contain the full features of Photoshop and therefore is a great alternative for new users. However, for more experienced users, you can use it by yourself, if you know your way around. Adobe Photoshop Elements 8 – GUIDES The following guides are about the Adobe Photoshop Elements 8. Adobe Photoshop Elements 8 – EXAMPLE We will talk about some important features in Adobe Photoshop Elements 8 to get the most out of it. Basic tools You will have the following tools: Eraser tool Flip tool Select Shadow and Highlight tool Paint bucket Clipping tool Painter brush Smudge and Blur tool Gradient tool Magic wand Expressionist tool Hue and saturation tool Pixel Bender tool Lasso tool Clone stamp Scissors tool Magic wand Clipping mask Correct tool Guides 05a79cecff

Little is known about risk factors for future falls in older community-dwelling people. The purpose of this study was to determine whether age, sex, balance impairment, walking limitation, history of fall, use of shoes, use of walking aids, number of chronic diseases, and use of medication influence future falls in older people. The population was participants in the Study on Polypharmacy, Frailty and Dementia (SPF-DA), a prospective multicenter observational study of a representative sample of older people. Participants were included if their age was 60 or older and they reported no history of falls during the preceding year. The sample was composed of 991 participants. The incidence of falls was 27.4% over 3 years of follow-up. Age and balance impairment were associated with more falls, and walking impairment was associated with fewer falls. The probability of falling was 80% higher (95% CI, 20.2%-186.5%) in participants with a history of falling than in those without a history of falling. Incidence of falls was 29% higher (95% CI, 14.4%-46.0%) in participants who used walking aids than in those who did not use them. Higher likelihood of falls was also associated with greater numbers of chronic diseases and use of medication. Further studies are needed to determine whether the prevention of falls would reduce the risk of falls. ### What's New In?

New Delhi: The Supreme Court on Monday quashed the conviction of six men for murder and rape of the eight-year-old child on the Delhi train, observing that there is a "higher standard of proof" for acquittal. "If

there is no evidence of the child being murdered or sexually abused, the legal presumption is that the child is an unharmed victim," Chief Justice Ranjan Gogoi said in the judgment, which was announced at a bench hearing as a "bulletin". The judgment, based on its consequences, effectively ends a multi-year legal tussle — with various states, the Centre and the Supreme Court arguing over the appropriateness of rape convicts being awarded the highest punishment under the law — over the Delhi incident. Under "bastardy" law, the maximum sentence for rape is life imprisonment. The apex court verdict imposes a three-year sentence on each of the six convicts for the crime of rape. "The pre-supposition that the child was an unharmed victim disappears. In such a case, the very idea of reopening the investigation against the accused is wholly undesirable," the court said. "The phrase 'he/she (unharmed) must not have been guilty of any mistake' means: the presumption is that the child was not guilty of any mistake and that the child, as an unharmed victim, would not have had any animosity towards the accused. Such a presumption is at variance with the presumption of innocence," the court said. The high court had in 2018 rejected the eight-year-old's statement that she was "not sexually assaulted" in the incident and quashed the convicts' conviction and sentenced them to the maximum punishment. On October 3, 2019, the apex court, in a 3:1 judgment, upheld the high court's decision. The court in the latest judgment said, "The presumption of innocence remains inviolate even if the accused is an accused of rape". The high court, in its verdict, had held that the disclosure of the child's statement ought to have placed "obligation on the prosecution to reopen the investigation or produce as evidence, if it had any, the mobile phone, on which the statement was recorded". The apex court held that since the prosecution did not provide any such evidence, the presumption of innocence "is not destroyed and therefore the presumption of innocence remains unshaken
